DIESL executing Rs 100-cr. tech upgrade

...becomes 1st freight forwarder to implement a Distribution Management System

Exim News Service
MUMBAI, July 21
DRIVE India Enterprise Solutions Ltd (DIESL), a pioneer in technology-aided logistics, has implemented the first phase of its path-breaking Rs 100-crore technology upgrade plan.

DIESL, which roped in Tata Consultancy Services (TCS) for the largest technology spend in the logistics sector by a private sector com-

pany, went live with the Import-Export Management Software module for its International Logistics Solutions (ILS) division.

The software, christened Connect International, was rolled out in Mumbai recently. It will be replicated in Delhi, Kolkata, Bangalore and all its new offices by August 15.

DIESL has thus become the first freight forwarder to implement a Distribu-

tion Management tool, which was earlier used only by major shipping lines. The technology upgrade will be the backbone of all service offerings by DIESL as it can be seamlessly integrated into

client systems as well as provide technology upgrades to clients with limited technology capabilities.

The software can manage the data of 30,000 pin codes
